FORENSIC & RISK ADVISORY SERVICES

PROTECTING AND SAFEGUARDING
YOUR ORGANIZATION

Every organization will be exposed to fraud at some point, making it critical to design controls and procedures to manage the risk. Your key stakeholders want to know that your organization is on sound financial footing. We can provide that assurance to your members, donors, board members and other key stakeholders with our forensic and risk advisory solutions. We provide a full range of forensic and internal auditing services allowing our tax-exempt clients to mitigate the risk of fraud and put in place effective fraud prevention processes and procedures.

Our experienced Certified Fraud Examiners provide fraud risk assessments that will identify and address internal control vulnerabilities before they happen. In the event of a potential fraud, our team utilizes specialized forensic techniques to uncover evidence of fraud and quantify the loss.

Calibre CPA uses a phased approach to our internal audit services. We help tax-exempt organizations of any size evaluate and improve their governance, risk management and internal controls with tailored, cost-effective solutions.
